HEALTHY FORESTS FOR FISH AND WILDLIFE WORKSHOP • JUNE 4, 2009

Do you have woods on your property? The presence of wildlife is one of the highlights of living in a wooded area. Washington State University Extension is offering a free forestry and wildlife workshop for small woodland owners in north Snohomish County. This class will teach woodland owners practical steps to attract more wildlife and biodiversity to their property. Participants will learn about different types of habitat, how to enhance streamside areas for salmon, grant and cost-share programs available to help landowners improve habitat on their property, and where to find assistance with forestry and wildlife issues, including free on-site consultations from a forester or wildlife biologist.

The workshop will feature speakers from Washington State University, the Department of Natural Resources, the Department of Fish and Wildlife, the Snohomish Conservation District, and the Stilly-Snohomish Fisheries Enhancement Task Force.

Space is limited—reserve your spot by pre-registering. Register free online at <http://snohomish.wsu.edu/forestry/wildlifeworkshop.htm> or contact Kevin Zobrist, WSU Extension Forester, at (425) 357-6017.

Location

Healthy Forests for Fish and Wildlife Workshop

6–9 PM, Thursday June 4, 2009

Loyal Heights Community Club in Arlington (Bryant area)
